CLASS FEATURES

1

Spellcasting

Cantrips Whenever you finish a Long Rest, you can replace one of your cantrips from this feature with another Wizard cantrip of your choice.

Spellbook Your wizardly apprenticeship culminated in the creation of a unique book: your spellbook. It is a Tiny object that weighs 3 pounds, contains 100 pages, and can be read only by you or someone casting Identify. You determine the book's appearance and materials, such as a gilt-edged tome or a collection of vellum bound with twine.

Spell Slots The Wizard Features table shows how many spell slots you have to cast your level 1+ spells. You regain all expended slots when you finish a Long Rest.

Changing Your Prepared Spells Whenever you finish a Long Rest, you can change your list of prepared spells, replacing any of the spells there with spells from your spellbook.

Spellcasting Ability Intelligence is your spellcasting ability for your Wizard spells.

Spellcasting Focus You can use an Arcane Focus or your spellbook as a Spellcasting Focus for your Wizard spells.

1

Ritual Adept

You can cast any spell as a Ritual if that spell has the Ritual tag and the spell is in your spellbook. You needn't have the spell prepared, but you must read from the book to cast a spell in this way.

1

Arcane Recovery

When you finish a Short Rest, you can choose expended spell slots to recover. The spell slots can have a combined level equal to no more than half your Wizard level (round up), and none of the slots can be level 6 or higher. Once you use this feature, you can't do so again until you finish a Long Rest.

3

Necromancy Savant

The gold and time you must spend to copy a necromancy spell into your spellbook is halved.

3

Grim Harvest

You gain the ability to reap life energy from creatures you kill with your spells. Once per turn when you kill one or more creatures with a spell of 1st level or higher, you regain hit points equal to twice the spell's level, or three times its level if the spell belongs to the School of Necromancy. You don't gain this benefit for killing constructs or undead.

4

5

Memorize Spell

Whenever you finish a Short Rest, you can study your spellbook and replace one of the level 1+ Wizard spells you have prepared for your Spellcasting feature with another level 1+ spell from the book.

6

Undead Thralls

You add the animate dead spell to your spellbook if it is not there already. When you cast animate dead, you can target one additional corpse or pile of bones, creating another zombie or skeleton, as appropriate. Whenever you create an undead using a necromancy spell, it has additional benefits:

The creature's hit point maximum is increased by an amount equal to your wizard level.

The creature adds your proficiency bonus to its weapon damage rolls.

10

Inured to Undeath

You have resistance to necrotic damage, and your hit point maximum can't be reduced. You have spent so much time dealing with undead and the forces that animate them that you have become inured to some of their worst effects.

14

Command Undead

You can use magic to bring undead under your control, even those created by other wizards. As an action, you can choose one undead that you can see within 60 feet of you. That creature must make a Charisma saving throw against your wizard spell save DC. If it succeeds, you can't use this feature on it again. If it fails, it becomes friendly to you and obeys your commands until you use this feature again.

Intelligent undead are harder to control in this way. If the target has an Intelligence of 8 or higher, it has advantage on the saving throw. If it fails the saving throw and has an Intelligence of 12 or higher, it can repeat the saving throw at the end of every hour until it succeeds and breaks free.
